Next word list   X65024_en

Write a function *next_word_list*(w, f) that given a nonempty string w and a list of strings f, returns the list formed by the strings in f that appear just after each ocurrence of w in f. The order of appearance of the words in the resulting lists must preserve the original order.

Sample session

```
>>> next_word_list('red', ['red','yellow','red','black','grey','red'])
['yellow', 'black']
>>> next_word_list('big', ['small','big'])
[]
>>> next_word_list('big' , ['big','small'])
['small']
>>> next_word_list('blue', ['green'])
[]
>>> next_word_list('blue', [])
[]
>>> next_word_list('red', ['red','red','red'])
['red', 'red']
```
